Access your files, anywhere

The ability to use a smartphone, tablet, or computer to access your account means your files follow you everywhere.

Security you can trust

2-factor authentication and user-controlled encryption are just a couple of the security features we allow to help secure your files.

Real-time collaboration

Securely share files and folders with friends, family and colleagues for live collaboration. No email attachments required.

Store any type of file

Whether you're sharing holiday photos or work documents, Fylo has you covered allowing for all file types to be securely stored and shared.

Never let location be an issue when accessing your files. FileX has you covered for all of your file storage needs.

Securely share files and folders with friends, family and colleagues for live collaboration. No email attachments required.
